

IDEAL NC SANDING SEALER

PRODUCT DESCRIPTION AND USES

Based on Nitro-Cellulose (NC), with fast drying and excellent sealing properties. NC Sanding Sealer is required for sealing any wood surfaces requiring a highly smooth finish.

Used as a base coat for other wood finishes such as NC Clear Varnish Gloss/Matt, PU Varnish Gloss/Matt etc.

SURFACE PREPARATION

Surfaces should be completely clean, dry and free from dirt and grease. Sanding must be done prior to painting.

Previously lacquered surfaces must be sanded FIRST.

FINISH

Semi-matt.

APPLICATION

By spray gun. Apply 1 or 2 cross coats, depending on the porosity of the wood. Sanding in between coats is recommended, but ensure that previous coats are thoroughly dry.

THINNING AND MIXING

Ideal High gloss thinner or Ideal Standard thinner.

EQUIPMENT CLEANING

Clean equipment immediately after use with Ideal High gloss or Ideal Standard thinner.

DRYING TIME

5-15 minutes. Can be sanded and over coated after 30 minutes.

COLOUR RANGE

Clear

SPREADING CAPACITY

7-10M² per litre, depending on surface porosity

PACK SIZES

4 litres & 20 litres.
